new_season --hunt=ai_code

AI writes the code. You find the bugs.

Hunt real flaws in AI-generated code: logic slips, security holes, race conditions, hallucinated APIs. Spot the bug, explain the fix, earn XP and climb the global ranks.

Python JavaScript TypeScript Go Java Rust SQL

paginate.py · AI-generated EASY

```
1  def paginate(items, page, size):
2  # return one page of results
3  start = page * size
4  end = start + size + 1
5  return items[start:end]
6
7  print(paginate(list(range(10)), 0, 3))
```

BUG

Bug confirmed: off-by-one on line 4
Slice returns size + 1 items. Fix: end = start + size

+120 XP

// how_it_works

Read. Hunt. Patch. Climb.

01

Pick a snippet

Every challenge is code written by an AI model, with one or more real bugs hiding inside.

02

Flag the bug

Mark the faulty line, pick the bug class and explain what breaks. Vague guesses don't score.

03

Submit the patch

Write the fix. Hidden test cases run against it, so your patch has to actually work.

04

Earn XP & rank up

Harder bugs pay more. First bloods earn bonuses. Your rank shows on your public hunter profile.

// challenges

A growing library of broken code

All Security Logic Concurrency Hallucinated APIs

STATUS	CHALLENGE	LANGUAGE	BUG CLASS	DIFFICULTY	REWARD
✓	**Leaky Pagination**	Python	Logic	Easy	120 XP
○	**Trust Me, I Sanitized It**	JavaScript	Security · XSS	Medium	300 XP
○	**Race to the Wallet**	Go	Concurrency	Hard	650 XP
✓	**The Phantom Import**	TypeScript	Hallucinated API	Easy	100 XP
○	**Quadratic Surprise**	Java	Performance	Medium	280 XP
○	**DROP TABLE Feelings**	SQL	Security · Injection	Hard	700 XP

// arena

Hunt solo, or go head to head

1v1 Duels

Same snippet, same clock. The first valid bug report with a working patch takes the round.

Weekly Hunts

Timed tournaments with a fresh set of AI-written services every week. Top hunters earn season badges.

Team Raids

Squad up with friends or classmates and clear a whole AI-built codebase together.

Learning Paths

Guided tracks that teach the bug patterns AI models get wrong most, from basics to exploits.

// ranks

From larva to legend

TIER 1 | TIER 2 | TIER 3 | TIER 4

Larva

Your first squashed bugs.

Hunter

Reliable on logic and edge cases.

Exterminator

Security and concurrency specialist.

Arena Legend

No AI bug survives you.

$ ./start_hunt.sh

The AI shipped it. Can you break it?
